

LINDOKUHLE SIBONGIMPILO CHILI

Cloud Engineer | DevOps | Software Developer

Johannesburg / Durban, SA • Lindo.chili18@gmail.com • 0659148119 • github.com/LindokuhleChili • master.d24eprcs803nt0.amplifyapp.com

PROFESSIONAL PROFILE

Final-year Diploma in Business Information Technology student at the University of Johannesburg, targeting a career in Cloud Engineering, DevOps, and Software Development. I build real solutions to real South African problems, from a civic tech platform closing a national inefficiency gap, to an LMS designed for children without access to laptops. I lead teams, design architecture, and write production-quality code. I have maintained a 70.75% cumulative GPA with 7 distinctions, a 75% second-year average, and an upward academic trajectory every single year. I don't wait for opportunities; I build them.

EDUCATION

Advanced Diploma in Business Information Technology (NQF Level 7) <i>University of Johannesburg Undergraduate qualification, pathway to BCom Honours in Information Systems</i> Conditionally accepted	2027 (Upcoming)
Diploma in Business Information Technology (NQF Level 6) <i>University of Johannesburg</i> - Cumulative GPA: 70.75% Year 2 average: 75% Transcript summary: "WELL DONE" 7 distinctions: Business Analysis 2A (95%), Communication Networks 3A (88%), Communication Networks 2A (84%), Business Analysis 2B (83%), Information Systems 1B (79%), Development Software 2B (75%), Information Systems 1A (75%) - Upward trajectory: 65.8% (2024) → 75% (2025) → 72.3% (2026, ongoing) - Relevant modules: Business Analysis, Information Systems, Development Software, Systems Software, Communication Networks	Feb 2024 – Present

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, PHP, HTML, CSS
Frameworks & Tools: React, React Native, Windows Forms, Git, GitHub, VS Code, Figma
Databases: SQL, MySQL, Supabase, Firebase Firestore
Cloud Platforms: Microsoft Azure (Active), AWS (Active) | Studying: AWS SAA-C03, Microsoft AI-200
OS & Infrastructure: Linux, Windows
Concepts: OOP, Multi-Tier Architecture, Systems Analysis & Design, Agile/Scrum, REST APIs, CRUD, SDLC, Version Control, CI/CD Foundations, Business Process Modeling, Database security
Languages Spoken: English (Professional), Zulu (Native)

TECHNICAL PROJECTS

Verification Engine <i>Solo Developer C#, AWS CDK, Cognito, Rekognition, Textract, Step Functions, React</i> - Architected and deployed a serverless AWS platform letting South African shareholders claim unpaid dividends and lost shares without paperwork, replacing manual KYC with real biometric and document verification - Built the entire system as infrastructure as code using AWS CDK (C#): Cognito authentication, API Gateway, Lambda, a single-table DynamoDB design, and S3 document storage - Integrated Amazon Rekognition for facial identity verification and Amazon Textract for OCR, with a Step Functions workflow orchestrating a two party deceased estate verification flow - Diagnosed and fixed real issues, including a CORS authorisation bug and IAM token scoping, by testing the live deployed system end to end	Aug 2026
Learning Management System with Windows Simulator <i>Team Lead (6 developers) React Native, JavaScript, SQL, Supabase, 3D Modeling</i> - Led all architecture planning, role assignment, sprint management and code reviews across the full development lifecycle - Added the Windows environment simulator, and personally built the teacher portal, quiz engine, file handling system, multi-account type system, and full Supabase database schema - Replicated core LMS functionality (Moodle-equivalent) with a 3D model viewer, designed for children without laptops, directly addressing a gap in the SA education system - Managed end-to-end delivery of a complex multi-module system across a 6-person Agile team	Mar 2026 – present

Unclaimed Funds Beneficiary Platform <i>Developer JavaScript, HTML, CSS, SQL</i> ▸ Engineered a full-stack public-benefit platform enabling South Africans to search and claim unclaimed funds from multiple sources ▸ Identified a critical national inefficiency in how South Africans access unclaimed funds; researched the problem and engineered a solution independently ▸ Full CRUD implementation with a relational SQL backend, designed for accessibility and ease of use ▸ Addresses a significant SA economic problem, connecting citizens to money legally owed to them	<i>July 2025 – October 2025</i>
---	---------------------------------

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Microsoft AI-200 Exam <i>Currently studying Exam voucher earned via Microsoft AI Fest completion + Credly badge awarded</i>	<i>Planned: October 2026</i>
AWS Certified Solutions Architect Associate (SAA-C03) <i>In progress: Stéphane Maarek's SAA course (Udemy)</i>	<i>Planned: Late 2026</i>
Microsoft AI Fest (Completed) <i>Awarded Credly badge and AI-200 exam voucher for demonstrated AI knowledge</i>	<i>June 2026</i>

COMMUNITY & PROFESSIONAL ENGAGEMENT

AWS Mzansi Community Jozi.JS Tech Meetups <i>Active member via Meetup platform</i> ▸ Regular attendee of cloud-focused networking and learning events through AWS Mzansi ▸ Active participant in Jozi.JS, the Johannesburg's JavaScript developer community ▸ Proactively attends industry events to stay current and build professional networks	<i>2025 – Present</i>
---	-----------------------

LEADERSHIP & ACHIEVEMENTS

Technical Team Lead, University Projects ▸ Consistently appointed lead across all group projects due to technical expertise and initiative ▸ Led teams of up to 6 developers, responsible for architecture decisions, task delegation, sprint planning, and quality delivery	<i>2025 – Present</i>
Peer Mentor: C# OOP & Python ▸ Informally tutored classmates in Object-Oriented Programming in C# and Python ▸ Debugged code, explained concepts, and supported peers, demonstrating communication and leadership beyond the classroom	<i>2024 – Present</i>
