Award

1st Place, Winning Team | *Vodacom / UJ / AWS AI for Africa Challenge* 2 October 2026

- Vodaworld Midrand. Built using AWS services including Amplify.

Objective

Business Information Technology diploma student (NQF 6) building a career in cloud engineering, DevOps, and software development. Hands-on experience designing and deploying serverless AWS solutions, building full-stack applications, and leading Agile teams, backed by strong networking coursework.

Technical Skills

Cloud & AWS: AWS (Active): Cognito, Rekognition, Textract, Step Functions, Amplify, CDK, API Gateway, Lambda, DynamoDB, S3 | Microsoft Azure (Active, AI-200 certified) | Studying: AWS SAA-C03
Scripting & Languages: Python, C#, JavaScript, PHP, HTML, CSS; shell scripting via Linux/Unix workflows
Networking: CIDR, OSI model, DNS, HTTP, TCP, UDP, DHCP, routing, switching, subnets, NAT (from Communication Networks modules, distinctions at 88% and 84%); multi-tier application concepts from coursework and AWS builds
Databases: SQL, MySQL, Supabase, Firebase Firestore; DynamoDB (single-table design)
Operating Systems: Linux, Windows; comfortable debugging and deploying on both
Frameworks & Tools: React, React Native, Windows Forms, Git, GitHub, VS Code, Figma
Concepts: OOP, Multi-Tier Architecture, Systems Analysis & Design, Agile/Scrum, REST APIs, CRUD, SDLC, Version Control, CI/CD Foundations, Business Process Modeling, Database security
Languages Spoken: English (Professional), Zulu (Native)

Projects

Verification Engine | *Solo* | *C#, AWS CDK, Cognito, Rekognition, Textract, Step Functions, React* Aug 2026

- Architected and deployed a serverless AWS platform for South African shareholders to claim unpaid dividends and lost shares, replacing manual KYC with biometric and document verification
- Defined infrastructure as code with AWS CDK (C#): Cognito auth, API Gateway, Lambda, single-table DynamoDB, and S3 document storage
- Integrated Amazon Rekognition (facial identity) and Amazon Textract (OCR); orchestrated a two-party deceased estate flow with Step Functions
- Troubleshot live production issues end to end, including a CORS authorisation bug and IAM token scoping on the deployed system

LMS with Windows Simulator | *Team Lead (6)* | *React Native, JavaScript, SQL, Supabase* Mar 2026 to Present

- Led architecture, role assignment, sprint planning, and code reviews for a 6-person Agile team, strong evidence of clear technical communication
- Built teacher portal, quiz engine, file handling, multi-account types, and full Supabase/SQL schema; added Windows environment simulator
- Delivered LMS functionality with a 3D model viewer for learners without laptops

Unclaimed Funds Beneficiary Platform | *Developer* | *JavaScript, HTML, CSS, SQL* July 2025 to October 2025

- Full-stack public-benefit platform for South Africans to search and claim unclaimed funds; relational SQL backend with full CRUD

Education

University of Johannesburg Johannesburg, SA
Diploma in Business Information Technology (NQF Level 6) *Feb 2024 to Present*

- Cumulative GPA: 70.75% | Year 2 average: 75% | Transcript summary: "WELL DONE"
- 7 distinctions, including Communication Networks 3A (88%) and Communication Networks 2A (84%), plus Business Analysis 2A (95%), Business Analysis 2B (83%), Information Systems 1B (79%), Development Software 2B (75%), Information Systems 1A (75%)
- Trajectory: 65.8% (2024), 75% (2025), 72.3% (2026, ongoing)
- Relevant modules: Communication Networks, Systems Software, Development Software, Information Systems, Business Analysis

University of Johannesburg Johannesburg, SA
Advanced Diploma in Business Information Technology (NQF Level 7) *2027 (Upcoming)*

- Conditionally accepted; pathway to BCom Honours in Information Systems

Certifications & Professional Development

Microsoft Certified: Azure AI Cloud Developer Associate (AI-200) | *Microsoft* Oct 2026 (valid to Oct 2027)

- Credential ID: B04DDABD2A002007 | Verify credential

AWS SAA-C03 | *Studying* Exam target: Late 2026

- Studying using Stephen Marquez's SAA course on Udemy, preparing for the exam (late 2026)

Microsoft AI Fest | *Completed* June 2026

- Awarded Credly badge and AI-200 exam voucher for demonstrated AI knowledge

Leadership & Communication

Technical Team Lead, University Projects 2025 to Present

- Appointed lead across group projects; led teams of up to 6 developers on architecture, task delegation, sprint planning, and delivery

Peer Mentor: C# OOP & Python 2024 to Present

- Tutored classmates in OOP (C# and Python); explained concepts and debugged code, building clear technical communication skills

Community & Professional Engagement

AWS Mzansi Community | Jozi.JS | Tech Meetups 2025 to Present

- Regular attendee of cloud-focused networking and learning events through AWS Mzansi
- Active participant in Jozi.JS, Johannesburg's JavaScript developer community
